NEW PRODUCTS

Vanguard™ Molded Fiber

Vanguard™ is a groundbreaking new line of molded fiber products. This new line demonstrates our continued leadership and innovation in foodservice packaging. The Vanguard™ line uses proprietary alternative compounds to achieve grease-resistance performance, without relying on conventional PFAS*. Made from reclaimed and rapidly renewable sugarcane fibers, these products meet EN13432 requirements for compostability certification.

The first SKUs available in the Vanguard™ line are listed in the table below. For specific inquiries about making a product with Vanguard™ fiber, please contact us.

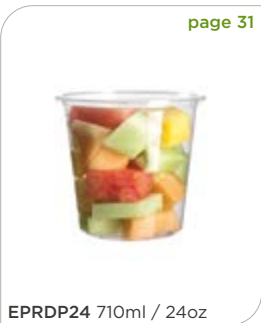

#	Product code	Product	Material	Size	Qty/case
Vanguard™ Line					
N 1	EPP013NFA	round plate VANGUARD™ (no PFAS added)	sugarcane	230mm	500
N 2	EPBL32CNFA	coupe bowl VANGUARD™ (no PFAS added)	sugarcane	940ml / 32oz	400
N 3	EPHC6NFA	clamshell VANGUARD™ (no PFAS added)	sugarcane	150x150x75mm	500
N 4	EPHC81NFA	clamshell VANGUARD™ (no PFAS added)	sugarcane	200x200x75mm	200

* Per- and polyfluoroalkyl substances.
Patents pending on the new formula.

OUR TWO PRODUCT LINES

GreenStripe® - Renewable & Compostable

■ Made from renewable plant materials that can be grown again and again.

■ Not made from oil like traditional plastics. All GreenStripe® products (except PSM Cutlery) are compostable, which means they can be returned to the soil to help plants grow.

■ Compostable GreenStripe® products are ASTM compliant and BPI or EN13432 certified compostable in commercial facilities only, which may not exist in your area.

■ Not suitable for backyard composting. These products need the high heat of a commercial pile to break down.

■ Paper and Sugarcane products can go in the freezer, although they are not airtight, so freshness and freezer burn can become issues if left there for too long. PLA can become brittle when frozen, so we don't recommend putting these products in the freezer.

BlueStripe® - Made with Post-Consumer Recycled Content

■ Made from post-consumer recycled materials that have been used, recycled, and repurposed, meaning fewer virgin resources are required and less landfill waste is created.

■ Making new products from recycled materials helps drive recycling markets and infrastructure.

■ Plastic can become brittle when frozen, so we don't recommend putting these products in the freezer.

■ BlueStripe® plastic products can't be recycled in most communities, but check with yours to find out what they'll accept.

■ BlueStripe® products incorporate the highest amount of post-consumer recycled material available without compromising performance.

■ BlueStripe® hot cups are not recyclable.

Material type

What is it?

Why we use it

What we use it for

PLANT-BASED PLASTIC (PLA)

- Polylactic acid
- Plastic made from starchy plants like corn.

- Looks and feels like traditional plastic, but is compostable in commercial composting facilities
- Want a plastic cup without the petroleum? Here it is.

- Cold Cups
- Hot cup lining
- Hot cup lids
- Cutlery
- Clear containers

PSM

- Made with a blend of renewable resources and conventional plastic

- Heat tolerant and super durable
- Contains 70% renewable materials (plant starch)

- Cutlery

SUGARCANE

- Also known as bagasse
- Made from the stalk left over after the cane juice is extracted to make sugar

- Renewable and fast growing
- Bagasse fiber is a byproduct that would otherwise be discarded or burned
- Compostable in commercial facilities

- Plates
- Bowls
- Containers
- Trays

SUGARCANE & BAMBOO BLEND

- Mix of bagasse and bamboo fiber

- Renewable and fast growing
- Bagasse fiber is a byproduct that would otherwise be discarded or burned
- Compostable in commercial facilities

- Plates
- Bowls

WHEAT STRAW

- Stalk leftover after wheat grains are harvested

- Renewable and fast growing
- Straw is a byproduct that would otherwise be discarded
- Compostable in commercial facilities

- Plates
- Bowls
- Containers

POST-CONSUMER RECYCLED FIBER (PCF)

- Used office paper, junk mail and other paper

- Post-consumer paper reduces demand for virgin fiber
- Supports recycling programs

- Hot cups

POST-CONSUMER RECYCLED PLASTIC (RPET)

- Polyethylene terephthalate is commonly used in pop and water bottles

- Post-consumer PET reduced demand for virgin plastic, and therefore petroleum
- Supports recycling programs

- Cold Cups
- Containers
- Lids for sugarcane bases

POST-CONSUMER RECYCLED POLYSTYRENE (RPS)

- Polystyrene is found in products such as CD cases and plastic hangers

- Post-consumer PET reduced demand for virgin plastic, and therefore petroleum
- Supports recycling programs

- Cutlery
- Hot Cup Lids

CUTLERY

■ **Wooden Cutlery**

Renewable & Compostable Wood Cutlery is a natural choice for your renewable dinnerware selection. Enjoy both hot and cold foods in comfort and style, for everything from soup to salad. These utensils won't warp, disintegrate, or melt when used with piping hot dishes.

DINNERWARE

■ Sugarcane Plates, Bowls and Portion cups

Renewable & Compostable Sugarcane Dinnerware is designed to be strong as well as grease and cut resistant. Sturdy and versatile, these plates and bowls work well for a wide variety of foods. They're the ideal alternative to traditional plastics or polystyrene, because they're made from reclaimed and rapidly renewable sugarcane fibers. These products are 100% renewable, and in VANGUARD™ EN13432 compostable.

■ Dahlia™ Plates and Bowl

Our Dahlia™ Dinnerware is made with a premium blend of bagasse and bamboo for a unique and undeniably green look. We've designed these plates and bowls in our signature leaf shape for that extra special touch. 100% renewable and ASTM D6868 compliant.

FOOD CONTAINERS

■ Folia™ Sugarcane Take-Out Containers

The patented Folia™ line was designed to completely redefine the take-out and leftover experience. Innovative features include tear-away flaps for easier access to food, leak resistant side flaps that prevent spills and hold condiments and cutlery, and a full array of sizes that satisfy a broad range of needs. These products are 100% renewable.

■ WorldView™ Take-Out Containers

Our WorldView™ Containers combine sugarcane bases with PLA or RPET lids for maximum strength and optimum presentation. Renewable and compostable PLA lids are perfect for cold foods, while the 100% recycled contents lids work equally well for hot or cold dishes. Available in a variety of shapes and sizes. PLA lids are EN13432 certified compostable.

■ Sugarcane Clamshells

Renewable & Compostable Sugarcane Clamshells are grease and cut resistant alternatives to traditional petroleum-derived plastics or foam. Sturdy and versatile, these clamshells can handle a wide variety of foods. Made from reclaimed and rapidly renewable sugarcane fibers. These containers are 100% renewable and in VANGUARD™ EN13432 compostable.

CLEAR GRAB & GO CONTAINERS

■ Clear Grab & Go Containers

Renewable & Compostable Containers are a more sustainable choice for serving a variety of cold foods. Made from PLA, a plant-based plastic, they are as strong and durable as their traditional counterparts, but don't rely on oil-based plastics. These containers are 100% renewable and EN13432 or BPI-certified compostable.

PAPER FOOD CONTAINERS

■ Paper Food Trays

Our new Paper Food Trays are the multipurpose workhorses of the foodservice world. Made from kraft paper board with a grease-resistant lining, these babies will serve up anything from sandwiches to chilli fries with ease.

■ World Art™ Paper Food Containers

Renewable & Compostable World Art™ Paper Containers are perfect for soups and deli foods and designed to communicate your green message. Made from 100% renewable plant materials and color coded for serving convenience. EN13432 certified compostable.

DRINKING CUPS

World Art™ Hot Cups

Renewable & Compostable World Art™ Hot Cups help you send a green message to the world. These cups are 100% renewable, and EN13432 certified compostable.

GreenStripe® Cold Cups

Showcase your commitment to green with the original Renewable & Compostable GreenStripe® Cold Cups. Strong and durable, Cold Cups provide a renewable way for you to enjoy your beverage without compromising quality. Made from PLA, a plant-based plastic, these cups are 100% renewable and BPI certified compostable.

Straws

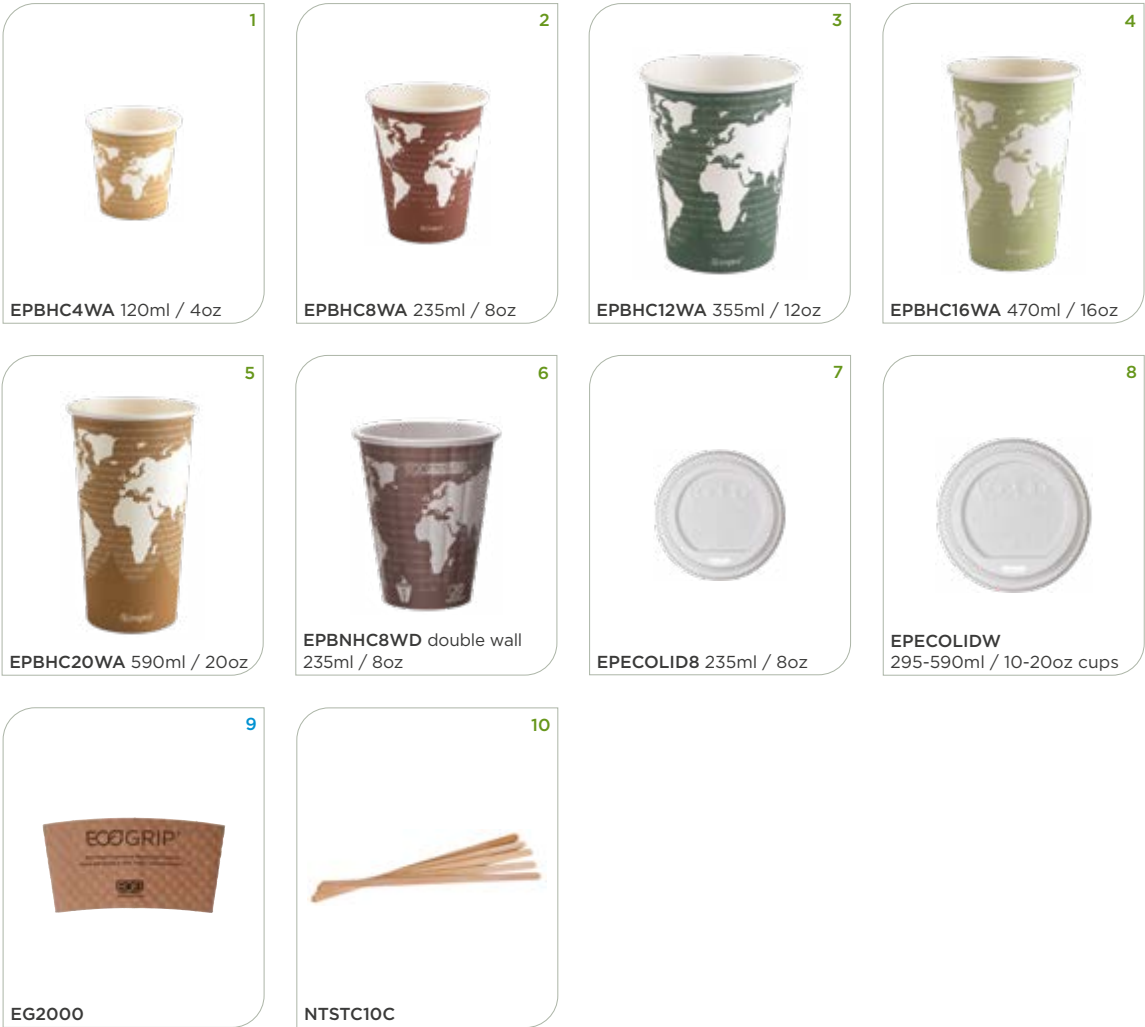

Renewable & Compostable Straws are the ideal finishing touch for cold beverages. Made from PLA, a plant-based plastic, these straws go perfectly with our GreenStripe® Cold Cups. 100% renewable and EN13432 certified compostable.

CUSTOMIZATION

Custom prints are a great way for you to promote your organization, brand or event while also encouraging waste diversion, sustainability, and smart purchasing.

Custom Product Development

Ready to go beyond simple customization? Custom shapes can fulfill your custom packaging and branding needs in ways that even custom printed items just can't. Our experienced design team can help you create a tailor-made product to serve your food with flair without sacrificing functionality.

Custom Print & Emboss

Your food isn't generic, so why should your packaging be? You don't have to use off-the shelf products that just anyone can use - you can build your brand with custom prints and embossing. With more than 60 customizable products, you can set yourself apart with a customized packaging suite. See page 47/48.

CMYK Color

If the art has gradients, blends, shadows, etc., or if it is made up of many colors like a photo, CMYK is the way to go. Cyan, Magenta, Yellow and Black ink can be combined in different amounts to achieve millions of colors. This is the default method for our paper products because the minimums are lower and it is faster and less expensive.

Spot Color

If the cup design has just a few solid colors, using spot color is the simplest way to go. Colors match better because the vendors use a specific color of ink rather than blending inks to build the colors. This is the only option when printing on our sugarcane or clear PLA products.

Custom Emboss

SERVICES

All of our services are 'Included in the Box'. In other words: complimentary. Gratis. On the house. No strings attached. If you are an Eco-Products™ customer, we'd love to help you spread the word about your sustainability mission.

Custom Life-Cycle Assessment

Want to know the carbon footprint of your Eco-Products®? We can generate a report outlining the carbon, energy, and life cycle data for the products you use. Improve your environmental program, track your numbers, and show your customers your commitment to sustainability with a customized Life-Cycle Assessment Report. Contact us at: ec.info@novolex.com

Training

We know sustainable disposables sound like an oxymoron, and there's a lot of information to take in if you are just getting to know us. We've created a bunch of interactive training modules and videos to help you learn more about us, our products and sustainability topics in general. Not to mention the Greenology section of our website, FAQs and download library! We also have our very own Sustainability Maven so if you ever have a question, contact us at: ec.info@novolex.com

Zero Waste Consulting

If you're interested in waste diversion but starting a composting program or increasing your recycling rates seems daunting, fear not! We've been at this for awhile now. From little coffee shops to huge stadiums, chances are we've seen your situation before and can help you navigate the waters of haulers, composters, best bin practices and the like. Don't go at it alone, we got this. Contact us at: ec.info@novolex.com

Video Production

In the age of the viral video, there's no denying that video is a powerful communication tool. We can help you harness that power. Our in-house team can shoot, process, edit and publish your video project. Whether it's a case study to publicize your sustainability efforts or a training video for your employees, let us help. Check out our past projects on our YouTube channel: youtube.com/user/greenisallwedo
